

# Guillermo Araya

Associate Professor  
The University of Texas at San Antonio  
Department of Mechanical Engineering  
One UTSA Circle  
San Antonio, TX 78249  
Office: AET 2.318  
Email: [juan.araya@utsa.edu](mailto:juan.araya@utsa.edu)  
Phone: 210.458.6479

## RESEARCH INTERESTS

Computational fluid dynamics of incompressible and compressible turbulent boundary layers, supersonic/hypersonic flow, aerodynamics, aerothermodynamics, turbulence modeling, DNS, LES, RANS, numerical heat transfer, parallel programming, HPC, scientific visualization, Virtual/Augmented Reality (VR/AR)

## EDUCATION

- **Ph.D.** (August 2008), Aeronautical Engineering-Rensselaer Polytechnic Institute (RPI), Troy, NY, USA. (GPA: 4:00/4:00)

Dissertation: *DNS of Turbulent Wall Bounded Flows With a Passive Scalar.*

- **M.S.** (2004) Mechanical Engineering-University of Puerto Rico (UPRM), Mayagüez, PR, USA (GPA: 4:00/4:00)

Dissertation: *Transient, Three-Dimensional Numerical Model of Laser Cutting Processes in Ceramics with Phase Change Consideration.*

- **Specialization Course** (1997) Specialist in Nuclear Energy Technological Applications-Balseiro Institute and University of Buenos Aires, Argentina.

- **B.S.** (1996) Aeronautical Engineering-Instituto Universitario Aeronautico, Cordoba, Argentina.

Dissertation: *Static and Dynamic Stability Analysis of an Air-Ground Missile.*

## PROFESSIONAL APPOINTMENTS

- **Associate Professor** – Department of Mechanical Engineering, The University of Texas at San Antonio, Texas, USA (01/2023-Present)
- **Associate Professor** – Department of Mechanical Engineering, University of Puerto Rico, Mayaguez, Puerto Rico, USA (01/2021-Present)
- **Assistant Professor** – Department of Mechanical Engineering, University of Puerto Rico, Mayaguez, Puerto Rico, USA (09/2015-12/2020)
- **Research Assistant Professor** – Department of Mechanical Engineering, Texas Tech University, Lubbock, Texas, USA (09/2011-08/2015)
- **Research Assistant** – School of Engineering, Civil and Computational Engineering Centre, Swansea University, UK (01/2009-08/2011)
- **Postdoctoral Fellow** – Department of Mechanical Engineering, Johns Hopkins University (07/2008-12/2008). Supervisor: Prof. Charles Meneveau.

## RESEARCH EXPERIENCE

- **Visiting Scholar** – Rensselaer Polytechnic Institute (Nov. 2009) and Portland State University (Nov. 2010), USA.
- **Visiting Student** – Department of Mechanical Engineering, Johns Hopkins University (01/2008-07/2008). Supervisor: Prof. Charles Meneveau.

- **Research Assistant** – Rensselaer Polytechnic Institute (08/2004-12/2007) – Performed computational fluid dynamics (CFD) of the velocity and thermal fields over streamwise homogeneous and non-homogeneous turbulent flows by using Direct Numerical Simulations (DNS).
- **Research Assistant** – University of Puerto Rico at Mayagüez (2003-2004) – Developed a 3D-transient heat transfer model (FORTRAN code) in finite volume and an analytical solution for simulating evaporative laser cutting processes. Another project involved numerical predictions of the time-response of a thin film temperature sensor in a lubricated contact.
- **Lab Assistant** – Constituyentes Atomic Center, Buenos Aires, Argentina (1997) – Detected and measured cracks induced by fatigue in metals through Non-Destructive Tests (NDT): radiographic, ultrasonic, eddy-current and dye penetrant techniques.
- **Research Assistant** – Argentine Air Force, Córdoba, Argentina (1996) – Designed an air-ground missile. Performed CAD prototype design and drawing, aerodynamic load distribution analysis through “Panel Method” FORTRAN software, drag determination in wind tunnel, range and static/dynamic stability analysis.

### TEACHING EXPERIENCE

- **Assistant Professor/Associate Professor** – University of Puerto Rico at Mayaguez: Applied Aerodynamics, Aircraft Performance and Heat Transfer (undergraduate courses). Advanced Fluid Mechanics, High Performance Computing and Parallel Programming (graduate courses).
- **Research Assistant Professor** – Texas Tech University: Heat Transfer (undergraduate Summer I and II 2015), Boundary Layer Theory (graduate, Spring 2012)
- **Graduate Teaching Assistant** – Rensselaer Polytechnic Institute (2004-2006): Thermal Fluids and Engineering II, Aerodynamics I and Fundamentals of Flight (undergraduate)
- **Graduate Teaching Assistant and Laboratory Instructor** – University of Puerto Rico at Mayaguez (2003-2004): Thermal Sciences in Mechanical Engineering (undergraduate)
- **Instructor** – EET N° 7, Quilmes, Argentina and EET N° 4, El Palomar, Argentina (2001-2002) – Taught courses in technical colleges of aeronautics: Aerodynamics, Statics, Resistance of Materials and Quality Management.

### INDUSTRIAL EXPERIENCE

- 02/2001 – 12/2002: Self – employed  
**Quality Management Consultant:** Conducted ISO 9000:2000 counseling in companies and industries for quality norm certification.
- 05/1998 – 01/2001: Coca-Cola FEMSA of Buenos Aires (Blowing Area)  
**Quality Supervisor:** Performed quality control management of the blowing process (PET bottles), statistical control of process, internal quality auditing and training of personnel.

### PATENTS

- *Coca-Cola FEMSA of Buenos Aires (1999)*: Participated in the design of an automatic instrument to test the stress cracking resistance in PET bottles (patent in Argentina AR016047B1).

### EXTERNAL GRANTS

#### Current Funded Research Proposals

- “Coherent structure assessment in high-speed crossflow jets”, AFOSR #FA9550-22-1-0089, \$210,053, 02/01/2022 to 01/31/2025, role: PI. Program Officer: Dr. Gregg L. Abate and Dr. Roger Greenwood.
- “CAREER: High fidelity numerical simulations of turbulent flow separation at high Reynolds numbers with passive scalar transport”, NSF #1847241, \$500K, 03/15/2019 to 02/29/2024, role: PI.

#### Past Funded Research Proposals

- “Scientific Visualization of Big Data”, CAWT-ITG3 (NSF #1849243), \$80,000, 08/12/2021 to 12/31/2022, role: Senior Personnel.
- “Collaborative Research: Effects of wall curvature on hypersonic turbulent spatially-developing boundary layers”, AFOSR #FA9550-17-1-0051, \$351,776, 12/15/2016 to 12/14/2021, role: PI. Program Officer: Dr. Ivett Leyva and Dr. Sarah Popkin.
- “High-end visualization of coherent structures and turbulent events in wall-bounded flows with a passive scalar”, GECAT-NCSA #ACI-1440733, \$48K, 09/09/2017 to 08/31/2020, role: PI. Include 46,250 node-hours of Broadening Participation allocation at the Blue Waters supercomputer (NCSA).

- “Turbulent flow separation induced by surface curvature with passive scalar transport”, PR NASA Space Grant (undergrad. G. Salzar), \$10K, 08/01/2019 to 05/30/2020, Role: PI and Mentor.
- “DNS of supersonic turbulent boundary layers subject to strong concave curvature”, XSEDE, 624K core-hours (estimated value of \$8,020), 01/01/2019 to 03/31/2020, role: PI.
- “Turbulence modeling and coherent structure assessment in crossflow jets”, PR NASA Space Grant (undergrad. G. Salzar), \$10K, 08/01/2018 to 05/30/2019, Role: PI and Mentor.
- XSEDE EMPOWER fellowship for undergraduate students: Spring 2018 (J. Santiago), Fall 2018 (J. Santiago), Spring 2019 (J. Santiago and M. Santiago), Fall 2019 (M. Santiago), \$6,150, Role: Mentor.
- PRLSAMP fellowship for undergraduate students: Fall 2016/Spring 2017 (D. Rodriguez), Spring 2017 (G. Torres), Spring 2019 (C. Lagares), \$3,200, Role: Mentor.
- “Identification of Lagrangian Coherent Structures (LCS) in accelerating turbulent boundary layers”, Blue Waters Student Internship Program (undergrad. E. Rivera), \$5K, 05/29/2017 to 05/31/2018, role: Mentor.
- “DNS of crossflow jets subject to very strong favorable pressure gradient”, PR NASA Space Grant (graduate C. Quiñones), \$15K, 08/01/2017 to 05/30/2018, Role: PI and Mentor.
- “Effects of streamwise pressure gradients and thermal stratification on jets in crossflow via DNS”, XSEDE, 168K core-hours (estimated value of \$6,140), 04/01/2017 to 03/31/2018, role: PI.
- “NSF/ONR (International): The role of inlet perturbations on superstructures of turbulent boundary layers-toward global flow control (in collaboration with the U. of Melbourne, Australia)”, NSF-CBET #1512393 co-funded by ONR, total \$718K, 07/01/2015 to 06/30/2018, role: Co-PI.
- “NSF-PIRE: USA/Europe partnership for integrated research and education in wind energy intermittency: from wind farm turbulence to economic management (in collaboration with Johns Hopkins University)”, NSF-PIRE #1243482, \$758K, 10/01/2012 to 09/30/2018, role: Senior Personnel.
- “Collaborative research: Assessment of high winds in North Norway via the WRF model for wind energy applications”, TTU-IRDD Seed grant, \$2K, 03/01/2015 to 03/01/2016, role: PI.
- “Renewable Energy Initiative”, ETF #22R031, \$50K, 09/01/2013 to 04/10/2017, role: PI.
- “Travel Fund for a Norwegian Visiting Scholar at TTU”, NTF-FU 84-13, Arctic University of Norway (UiT), Norway, \$26550, 05/01/2014 to 10/31/2014, role: Hosting Advisor.
- “Symposium on Frontiers of Fluid Dynamics-A Legacy”, NSF-CBET #1360659, \$15K, 10/01/2013 to 09/30/2014, role: Co-PI.
- “Effects of extreme external conditions on turbulent structures in a boundary layer”, XSEDE, 650K CPU hours, 08/15/2012 to 04/30/2014, role: PI.
- “Understanding stratification and wake evolution due to thermal fields for wind-turbine array over a rough-terrain (in collaboration with U. of Texas San Antonio)”, NSF-CREST #1242180, \$25K, 10/01/2012 to 04/30/2014, role: PI.
- “DNS of the temperature field on turbulent spatially-developing boundary layers with wall roughness”, HYDAC Technology Corp, \$7,573, 08/01/2013 to 12/31/2013, role: PI.
- “Numerical analysis of film cooling on turbulent spatially-developing boundary layers”, General Electric Global Research, \$24,076, 11/01/2011 to 07/31/2012, role: PI.
- “Gust generation modelling for aeronautical purposes”, Hector Supercomputer (UK), £11,419, 1.6M CPU hours, 07/01/2011 to 12/31/2011, role: Co-PI.
- “Numerical & Experimental Studies in Developing Turbulent Flows Via Multi-Scale Similarity”, NSF-CBET #0829020 and Co-funded with Office of Naval Research (ONR), \$416K, 09/01/2008 to 08/31/2011, role: Senior Personnel.
- “Scale adaptive simulations of turbulent flows”, Hector Supercomputer (UK), £2,724, 200K CPU hours, 01/15/2010 to 07/15/2010, role: Co-PI.
- “LES and DNS of Turbulent Spatially Evolving Boundary Layers in Pressure Gradient Flows Via Multi-Scale Method”, TeraGrid, 882K CPU hours, 11/07/2008 to 09/30/2012, role: Co-PI.
- “Thermal Boundary Layer Simulations Under Adverse Pressure Gradients”, TeraGrid, 250K CPU hours, 01/04/2007 to 12/31/2007, role: Co-PI.

#### **AWARDS AND MAJOR ACHIEVEMENTS**

- NSF-CAREER Award (2019-2024), CBET, Fluid Dynamics Program.
- Sigma Xi, The Scientific Research Honor Society - Full Member since 2020.
- AIAA Associate Fellow Class of 2021.
- 2018-2019 and 2020-2021 Distinguished Professor Award, Dept. of Mechanical Engineering at UPRM.

- Mini-symposium organizer titled "Spatially-Developing Turbulent Boundary Layers" at the 13th World Congress in Computational Mechanics (WCCMXIII and PANACM II) in New York City on July 25, 2018. A travel subsidy by XSEDE Community Engagement & Enrichment - Broadening Participation (CEE-BP) was awarded to Dr. Araya.
- Travel award by XSEDE to attend "Visualizing and Interacting with Data" workshop at Texas Advanced Computing Center (TACC) June 19-24, 2017.
- Travel award to attend the 69<sup>th</sup> Annual Meeting of the APS Division of Fluid Dynamics (November 20-22, 2016 Portland, OR) provided by XSEDE.
- Travel award by XSEDE to attend "Inquiry-Based Science and Mathematics Enhanced by Computational Thinking" workshop at Oklahoma State University, May 16 – 18, 2016.
- Selected for inclusion in the 11<sup>th</sup> Edition of Marquis Who's Who in Science and Engineering (2011 - 2012)
- Selected as supported student in the 13<sup>th</sup> Annual Summer Institute: Reducing Your Time To Solution, San Diego Supercomputer Center (July 2007, La Jolla, CA)
- Selected as young participant in the "Euler Equations: 250 Years On" conference with travel subsidy from NSF (June 2007, Aussois, France)
- Travel subsidy award from European Commission (Marie Curie program) for participating in the 11<sup>th</sup> European Turbulence Conference (June 2007, Porto, Portugal)
- Teaching/Research Assistantship and Tuition Scholarship at UPRM and RPI (2003-2008)
- Travel subsidy awards (2005 and 2006): Division of Fluid Dynamics of the American Physical Society.
- Full Scholarship (2001): CANE Foundation – Georgia Institute of Technology, training in ISO 9000:2000 Norms.
- Full Scholarship (1997): the National Atomic Energy Commission (CNEA), Argentina, Specialization Course.

### SELECTED PRESENTATIONS

- 1) *Effects of wall curvature on hypersonic turbulent spatially-developing boundary layers and Coherent structure assessment in high-speed crossflow jets*. **Invited Speaker**. 2022 AFOSR/ONR/HVSI Annual High-Speed Aerodynamics Portfolio Review. Pasadena, CA, July 18-22, 2022.
- 2) *Some recent advances on direct simulations of turbulent boundary layers*. **Invited Speaker**. Mentor seminar series from the Bridge to Doctorate Program (UPR), November 19th, 2021.
- 3) *Effects of wall curvature on hypersonic turbulent spatially-developing boundary layers*. **Invited Speaker**. 2021 AFOSR/ONR/HVSI Hypersonic Aerothermodynamics Portfolio Review (Virtual), July 19-23 2021.
- 4) *Research activities at the High Performance Computing and Visualization Laboratory (HPCVL)*. **Invited Speaker**. Engineering's week. AIAA UPRM Branch (Virtual), February 19, 2021.
- 5) *Wall temperature effect on hypersonic turbulent boundary layers via DNS*, AIAA SciTech 2021 Forum, 2021.
- 6) *Numerical subgrid-scale modeling of supersonic spatially-developing turbulent boundary layers*. The 73rd Annual Meeting of the APS Division of Fluid Dynamics. November 22–24, 2020; Virtual.
- 7) *Effects of wall curvature on hypersonic turbulent spatially-developing boundary layers*. **Invited Speaker**. 2020 AFOSR/ONR/HVSI Hypersonic Aerothermodynamics Portfolio Review (Virtual), July 27-31 2020.
- 8) *Numerical Predictions and Visualization of High-speed Turbulent Boundary Layers via DNS*. **Invited Speaker** as part of the seminar series of the program Computing and Information Sciences and Engineering (CISE) in UPRM on May 21st, 2020.
- 9) *Thermal Transport in High-Speed turbulent Boundary Layers*. **Invited Speaker** as part of SANDIA-UPRM webinars on August 11 and 12, 2020.
- 10) *Turbulent inflow information generation for supersonic boundary layers subject to concave wall curvature via DNS*. **Invited Speaker**. University of Central Florida. Orlando, FL, January 10, 2020.
- 11) *DNS of supersonic turbulent boundary layers subject to adverse and favorable pressure gradient*. **Invited Speaker**. University of South Florida. Tampa, FL, in January 9, 2020.
- 12) *Reynolds number dependency in supersonic spatially-developing turbulent boundary layers*, 2020 AIAA SciTech Forum (AIAA 3247313) 6 - 10 January, Orlando, FL, 2020.
- 13) *Turbulent inflow information generation for compressible boundary layers*, 72<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, 23 – 26 November, 2019. Seattle, WA, USA.
- 14) *Effects of wall curvature on hypersonic turbulent spatially-developing boundary layers*. **Invited Speaker**. 2019 Annual Review for the AFOSR High Speed Aerodynamics Portfolio and the ONR Hypersonics Portfolio. Boulder, CO, July 8-12 2019.
- 15) *Direct simulation of a Mach-5 turbulent spatially-developing boundary layer and Visualization of turbulent events in wall-bounded flows via Virtual Reality*, 49<sup>th</sup> AIAA Fluid Dynamics Conference, AIAA AVIATION Forum, (AIAA 3131876) 17 - 21 June, Dallas, TX, 2019.
- 16) *Compressibility effect on spatially-developing turbulent boundary layers via DNS*, 4th Thermal and Fluids Engineering Conference (TFEC2019), April 14-17, 2019, Las Vegas, NV, USA.
- 17) *Reynolds number dependency in supersonic spatially-developing turbulent boundary layers via DNS*, 71<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, 18 – 20 November, 2018. Atlanta, GA, USA.

- 18) *Direct Numerical Simulation of spatially-developing turbulent boundary layers*. **Invited Speaker**. 2018 Annual Review for the AFOSR High Speed Aerodynamics and the ONR Hypersonics Portfolio. July 30 2018, Arlington, VA.
- 19) *Computational fluid dynamics for aerodynamics applications*. **Invited Speaker**. Virtual conference to Universidad Nacional Federico Villarreal (Lima, Peru) on June 13, 2018.
- 20) *Hypersonic spatially-developing turbulent boundary layers via DNS*. 13<sup>th</sup> World Congress on Computational Mechanics (WCCM XIII). July 22-27, 2018, New York, NY, USA.
- 21) *DNS of accelerating crossflow jets*. 13<sup>th</sup> World Congress on Computational Mechanics (WCCM XIII). July 22-27, 2018, New York, NY, USA.
- 22) *DNS of spatially-developing turbulent boundary layers: visualization of turbulent events*. **Invited Speaker**. Barcelona Supercomputing Center, February 23 2018, Barcelona, Spain.
- 23) *Compressibility effect on thermal coherent structures in spatially-developing turbulent boundary layers via DNS*, 70<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2017, Denver, Colorado, USA.
- 24) *Effects of wall curvature on hypersonic turbulent spatially-developing boundary layers*. **Invited Speaker**. 2017 Annual Review for the AFOSR High Speed Aerodynamics Portfolio and the ONR Hypersonics Portfolio. July 27 2017, NASA Langley, Hampton, VA.
- 25) *DNS of Crossflow Jet Subject to Very Strong Favorable Pressure Gradient*. **Invited Speaker**. Soft Matter Seminar Series. REU Site, July 5 2017, UPRM, Mayaguez, PR.
- 26) *The laminarescent region in the quasi-laminarization process: a vorticity dynamics perspective*, 69<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2016, Portland, Oregon, USA.
- 27) *Shedding light into the quasi-laminarization process*, 46<sup>th</sup> AIAA Fluid Dynamics Conference, AIAA AVIATION Forum, (AIAA 2016-3188) 13 - 17 June, Washington, DC, 2016.
- 28) *The Weather Research and Forecasting (WRF) model for wind energy applications*. **Invited Speaker**. Dep. of Mechanical Engineering, University of Puerto Rico at Mayaguez, October 2016, Puerto Rico, USA.
- 29) *Assessment of Turbulence Models in the Aerodynamic Design of a Supersonic Car: Breaking the Land Speed World Record*. **Invited Speaker**. Dep. of Mechanical Engineering, University of Puerto Rico at Mayaguez, September 2015, Puerto Rico, USA.
- 30) *Numerical simulations of turbulent flows: from fundamental knowledge to wind energy applications*. **Invited Speaker**. College of Science and Engineering, Texas A&M University-Corpus Christi, April 2015, Corpus Christi, Texas, USA.
- 31) *Drag Reduction Mechanisms in Pipe and Channel Flows*. **Invited Speaker**. Dep. of Mechanical Engineering, University of Texas at San Antonio, January 2015, San Antonio, Texas, USA.
- 32) *Evolution of the Reynolds shear stresses in highly accelerated turbulent boundary layers*, 67<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2014, San Francisco, California, USA.
- 33) *Modelling of low-level jet and katabatic events via WRF and understanding its structural impact on wind turbines*. **Invited Speaker**. Nov. 6 2014, University of Texas at Dallas, USA.
- 34) *DNS of Turbulent Boundary Layers in the Quasi-Laminarization Process*, Progress in Wall Turbulence: Understanding and Modelling. Lille, France, June 18-20, 2014.
- 35) *Spatially-Developing Turbulent Momentum/Thermal Boundary Layers with Adverse Streamwise Pressure Gradients via DNS*. **Invited Speaker**. Turbulence, Mixing and Flow Control seminar series, June 23 2014, Imperial College, London, UK.
- 36) *Turbulent thermal boundary layers subjected to severe acceleration*, 66<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2013, Pittsburgh, Pennsylvania, USA.
- 37) *Analysis of Low Level Jets (LLJs) and its implications for wind energy*, VIII Brazilian Micrometeorology Workshop, November 20-22, 2013 Santa Maria, RS, Brazil.
- 38) *Assessment of the Dynamic Multi-scale Approach (DMA) in turbulent momentum/thermal boundary layers subjected to APG*. **Invited Speaker**. Symposium on Frontiers in Fluid Dynamics, November 1-3, 2013, San Juan, Puerto Rico, USA.
- 39) *The importance of turbulent inflow conditions on unsteady numerical simulations of spatially-developing boundary layers* (DOI: 10.4172/2168-9873.S1.002) **Invited Speaker**, 137<sup>th</sup> OMICS Group Conference. International Conference and Exhibition on Mechanical & Aerospace Engineering. September 30 - October 02, 2013 Hilton San Antonio Airport, USA.
- 40) *DNS of stratified spatially-developing turbulent thermal boundary layers*, 65<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2012, San Diego, California, USA.
- 41) *Numerical research at the National Wind Resource Center*. **Invited Speaker**. Dep. of Aerospace Engineering, Politecnico di Milano, October 2012, Milan, Italy.

- 42) *DNS of stable spatially-developing turbulent thermal boundary layers under weak stratification*, Conference on Turbulence (iTi 2012), October 2012, Bertinoro, Italy.
- 43) *CFD of Turbulent Flows: from Wind Energy Applications to the Aerodynamic Design of a Supersonic Car. Invited Speaker*. Dep. of Mechanical Engineering, University of Texas at San Antonio, September 2012, San Antonio, Texas, USA.
- 44) *On the similarities of the engineering and atmospheric boundary layers*, 20<sup>th</sup> Symposium on Boundary Layers and Turbulence, 9-13 July 2012, Boston, MA, USA.
- 45) *Future Experimental Study to Compare the Effects of Two-Bladed and Three-Bladed Model Wind Turbine Designs in an Array*, Wind Farms' Underperformance & Partnerships: Building Partnerships to Meet the 2030 Grand Challenge, March 28 - 29 2012, Lubbock, TX, USA ([poster](#)).
- 46) *Stable and Unstable Thermal Stratified Boundary Layers*, Wind Farms' Underperformance & Partnerships: Building Partnerships to Meet the 2030 Grand Challenge, March 28 - 29 2012, Lubbock, TX, USA ([poster](#)).
- 47) *Numerical Tools for Solving Turbulent Wall-Bounded Flows. Invited Speaker*. CIMAT, March 2012, Guanajuato, Mexico.
- 48) *Computational Fluid Dynamics of Turbulent Wall-Bounded Flows. Invited Speaker*. Dep. of Mechanical Engineering, Texas Tech University, February 2012, Lubbock, Texas, USA.
- 49) *DNS of very strong adverse pressure gradient flows with eventual separation*, 64<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2011, Baltimore, Maryland, USA.
- 50) *DNS at High Reynolds numbers of Thermal Turbulent Boundary Layers Subjected to External Pressure Gradients*, 64<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2011, Baltimore, Maryland, USA.
- 51) *Numerical simulations of a supersonic car: The Bloodhound Project. Invited Speaker*. Portland State University, November 2010, Oregon, USA.
- 52) *DNS of turbulent heat transfer in spatially-developing flows. Invited Speaker*. Los Alamos National Laboratory, November 2010, New Mexico, USA.
- 53) *Unsteady numerical simulations over the BLOODHOUND supersonic car*, 63<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2010, Long Beach, California, USA.
- 54) *Scale adaptive simulations over a supersonic car*, 6<sup>th</sup> International Conference on CFD, St. Petersburg, Russia, 2010.
- 55) *The Use of Turbulence Models in the Aerodynamic Design of A Supersonic Car: Breaking the World Record. Invited Speaker*. Rensselaer Polytechnic Institute, November 2009, New York, USA.
- 56) *A dynamic multi-scale approach for turbulent inflow generation in spatially-developing boundary layers with streamwise pressure gradients*, 61<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2008, San Antonio, Texas, USA.
- 57) *Numerical heat transfer analysis in turbulent wall bounded flows. Invited Speaker*. University of Karlsruhe, January 2008, Karlsruhe, Germany.
- 58) *Active control of turbulent heat transfer by local forcing: an energy assessment*, 60<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2007, Salt Lake City, Utah, USA.
- 59) *DNS of heat transfer in a high Reynolds number turbulent channel flow with local forcing*, conference on "Euler Equations: 250 Years On", June 2007, Aussois, France ([poster](#)).
- 60) *Thermal boundary layers simulations under adverse pressure gradients*, 11<sup>th</sup> European Turbulence Conference, June 2007, Porto, Portugal ([poster](#)).
- 61) *DNS of a passive scalar in a turbulent channel with local forcing at walls*, 59<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2006, Tampa, FL, USA.
- 62) *Numerical analysis of drag reduction in a turbulent channel with local forcing. Invited Speaker*. September 2006, University of Puerto Rico-Mayaguez, USA.
- 63) *DNS of heat transfer in turbulent channel flows*, 2<sup>nd</sup> Annual Tech Valley Engineering Symposium, April 2006, Albany, NY, USA.
- 64) *DNS in a turbulent channel with periodic blowing/suction velocity boundary conditions*, 58<sup>th</sup> Annual Meeting, APS Division of Fluid Dynamics, November 2005 Chicago, IL, USA.
- 65) *Generation of turbulent inlet conditions for velocity/thermal boundary layer simulations*, iTi 2005 conference on Turbulence, September 2005, Bad Zwischenahn, Germany.
- 66) *Computational generation of turbulent inlet conditions in spatially evolving boundary layers*, 1<sup>st</sup> Annual Tech Valley Engineering Symposium, April 2005, Albany, NY, USA.

**GRADUATE STUDENT ADVISING**

- James Cardillo: MS in Mechanical Engineering, Rensselaer Polytechnic Institute (RPI), New York. Graduation: May 2011. Currently Structural Analyst at Rotating Machinery Services, Inc.
- Gustavo Rivera-Rosario: MS in Mechanical Engineering, RPI. Graduation: December 2011. Currently Principal Aeronautical Engineer at Northrop Grumman.
- Yi Chen: PhD in Aeronautical Engineering, RPI. Graduation: August 2012. Currently Sr. CFD Development Manager at Altair.
- Can Liu: MS in Mechanical Engineering, Texas Tech University (TTU), Lubbock, Texas. Graduation: October 2013. Currently Sr. Sales Engineer at HVAC MANUFACTURING, INC.
- Suranga Dharmarathne: PhD in Mechanical Engineering, TTU. Graduation: August 2015. Currently, Assistant Professor at University of Indianapolis.
- Carlos Quiñones, MSc in Mechanical Engineering, University of Puerto Rico Mayaguez (UPRM). Graduation: Dec 2020. Currently CFD Engineer at General Motors.
- Miguel Ramirez, PhD in Mechanical Engineering, University of Puerto Rico Mayaguez (UPRM). Expected graduation: May 2022.
- Christian Lagares, PhD in Mechanical Engineering, University of Puerto Rico Mayaguez (UPRM). Expected graduation: May 2023 (**2021 NSF Graduate Research Fellow**)
- David Paeres, MSc in Mechanical Engineering, University of Puerto Rico Mayaguez (UPRM). Expected graduation: May 2022.

**UNDERGRAD STUDENT ADVISING**

- Ernesto Forteza (UPRM), Giovanni Vega (UPRM), Giancarlo Castellini (UPRM), Jeancarlos Perez (UPRM), David Paeres (UPRM, currently MSc student at UPRM), Eduardo O'Neill (UPRM), Manuel Santiago (UPRM), German Saltar (UPRM, currently PhD student at UIUC, **2020 NSF Graduate Research Fellow**), Jean Santiago (UPRM, currently engineer at ERDC), Daniel Rodriguez (UPRM, currently Engineer at GM), Gabriel Torres (UPRM, currently PhD student at Purdue University), Ernie Rivera (UPRM, currently ESDP Mechanical Engineer at NAVAIR Air Station), David Halbritter (TTU) and Jonas Beyene (TTU).

**VISITING SCHOLAR ADVISING:**

- Muhammad Bilal, PhD Research Fellow - Wind Energy, University of Tromsø, Norway.
- Praju Kiliyanpilakkil, PhD Candidate, Department of Marine, Earth, and Atmospheric Sciences; North Carolina State University, Raleigh, NC, USA.

**MEMBERSHIP:** Sigma Xi, AIAA Associate Fellow, APS, ACM.

**PEER REVIEWING ACTIVITIES AND SERVICES:**

- Member of the Meshing, Visualization, and Computational Environment Technical Committee at AIAA since 2018.
- Mini-symposium organizer at the 13<sup>th</sup> World Congress in Computational Mechanics (Title: Spatially-developing turbulent boundary layers), July 22-27, 2018 New York City, USA.
- Workshop organizer (Title: The WRF model: Fundamentals and its Applications) Oct. 31, 2016, U. of Puerto Rico, Mayaguez, PR, USA.
- Technical judging volunteer of student papers, AIAA Region II Student Conference (2016, 2017, 2018, 2019)
- Faculty advisor of the UAV Search and Rescue project (AIAA Region II, U. of Puerto Rico, Mayaguez), 2016-2020.
- Session Chair: APS-DFD 2010, APS-DFD 2018, AIAA Aviation 2016, AIAA Aviation 2019, AIAA SciTech 2020.
- Proposal reviewer at NSF-CAREER (2021), NSF-EPSCoR Track 4 (2019), NSF-Fluid Dynamics (2016), NSF-CDS&E Turbulence (2017, 2018, 2019) NASA NSPIRES program (2011) and CONICYT-Chile (2009)

- Reviewer of Nature, Physics of Fluids, Journal of Fluid Mechanics, Int. J. of Heat and Mass Transfer, Int. Journal of Heat and Fluid Flow, AIAA Journal, Fluid Dynamics Research, Fluids, Computers and Fluids, Journal of Turbulence, Int. J. of Thermal Sciences, Numerical Heat Transfer, ASME, Applied Mathematical Modelling and Chemical Engineering Communications.
- Mini-symposium organizer at the First Pan American Congress on Computational Mechanics PANACM 2015 (Title: DNS/LES of turbulent wall-bounded flows), April 27-29, 2015 Buenos Aires, Argentina.
- Mini-symposium organizer at the VIII Brazilian Micrometeorology Workshop (Title: The effects of atmospheric parameters on wind power generation), November 20-22, 2013 Santa Maria, RS, Brazil.
- Organizing committee member of Mech Aero-2013, 137<sup>th</sup> OMICS Group International Conference and Exhibition on Mechanical & Aerospace Engineering: September 30-October 2, 2013 San Antonio, Texas, USA.

**COLLABORATORS AND INTERACTIONS (last five years):** Prof. K. Jansen (U. of Colorado Boulder), Prof. C. Meneveau (The Johns Hopkins University), Dr. O. Lehmkuhl (BSC, Spain), Dr. A. Craig (NCSA), Prof. S. Torres (UPRM), Prof. M. Menegozzo (UPRM), Prof. W. Rivera (UPRM), G. Marin (BSC, Spain), Prof. A. Tejada-Martinez (USF), Prof. J. Lugo (UPRM), Prof. S. Leonardi (U. of Texas Dallas), Prof. L. Castillo (Purdue U.), Prof. F. Hussain (TTU).

#### **PERSONAL SKILLS**

**Computer Software and Language:** Parallel Computing MPI, FORTRAN90/95, C, C++, Unix/Linux, scientific visualization tools (Paraview, VisiItl, Tecplot, Maya, Blender), Fluent, CCM+, Latex, AutoCAD, MATLAB, Moodle, Unity VR.

**Language:** Advanced level in English, native Spanish speaker.
