invite you to attend

# STRECH

Seminars in Translational Research

## Presents

### *Prevention, Treatment and Clinical Trials for COVID-19*

The COVID-19 pandemic has presented unique challenges for prevention and treatment of this infection. Clinical trials have had to be conducted with unique challenges due to infection prevention issues and need for patient isolation. Additionally, the urgency and extent of the pandemic has led to rapid initiation and enrollment in clinical trials at an unprecedented pace. This presentation will discuss strategies to combat SARS-CoV-2 including studies conducted at UT Health and in San Antonio.
