Cultural  
Sustainability

**UTSA** College of Architecture

2013  
Annual Report

The Center for Cultural Sustainability spent 2013 working towards several measures of success developed in the previous year to guide our objectives and assess our performance.

Each of four key areas:

1. Knowledge and awareness about the center from scholars, community, media, professionals and students
2. Sponsored projects that support the CCS Mission
3. Publications and lectures developed or sponsored by the CCS
4. Funding and revenues

Claudia and I have established metrics for increases in the number of research faculty, sponsors and collaborations; creative output in terms of research projects and scholarly publications; the number of students engaged; growth in awareness of the center; and revenue enhancement.

From the number of grants submitted to the level of student engagement, the CCS advanced on all our measures of success in 2013, setting the stage for a successful 2014 as a contributor to the College of Architecture's goals and the university's attainment of tier one status.
